PROFESSIONAL SUMMARY

Full Stack Developer with a strong foundation in **data-driven application development**. Experienced in building scalable systems using **React, Node.js, Python, and SQL**. Skilled in **data analysis, workflow automation, backend engineering, API design, and microservices architecture**, with working knowledge of **AWS**. Adept at combining software engineering and data insights to deliver impactful solutions.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML) <i>Vasireddy Venkatadri Institute of Technology</i>	2021 – 2025 <i>CGPA: 7.26/10</i>
--	-------------------------------------

EXPERIENCE

Full Stack Developer <i>Eljo Solutions</i>	Feb 2026 – Present
– Developing full stack applications using React.js, Node.js, and REST APIs. – Designed scalable backend systems and optimized SQL queries for performance improvement. – Implemented end-to-end features including UI, APIs, and database integration. – Worked on system design involving hierarchical workflows and scheduling logic.	
Decision Science Trainee <i>Mu Sigma</i>	May 2025 – Jan 2026
– Analyzed large datasets using Python and SQL to derive actionable insights. – Automated workflows improving efficiency and reducing manual processing time. – Performed data cleaning, validation, and dashboard creation.	

TRAINING

AWS Re/Start Graduate <i>Tech Mahindra Academy</i>	2025
– Gained hands-on experience in AWS services (S3, EC2) and cloud fundamentals. – Worked on deployment, storage, and basic cloud architecture. – Learned networking, security, and best practices in cloud computing.	

PROJECTS

Design & Resource Scheduler System <i>React.js, Node.js, SQL, REST APIs</i>	2026
– Developed a scalable system for resource scheduling and hierarchical workflow management. – Implemented multi-level hierarchy handling with dependency management. – Designed backend APIs and optimized queries for real-time scheduling. – Built responsive UI for monitoring and managing resources.	
AI Interview System (Microservices Architecture) <i>Python, Node.js, Microservices, APIs</i>	2025
– Built an AI-driven interview platform using microservices architecture. – Developed independent services for question generation, evaluation, and feedback. – Enabled scalable communication using APIs between services. – Improved reliability and maintainability through service decoupling.	

SKILLS

Programming: Python, JavaScript, SQL, Java
Frontend: React.js, HTML, CSS
Backend: Node.js, Flask, REST APIs
Cloud: AWS (S3, EC2)
Tools: Git, Docker, Power BI, VS Code

CERTIFICATIONS

AWS Cloud Foundations
Salesforce Certified AI Associate
Google Business Intelligence
Advanced Certified ScrumMaster (A-CSM)
